

AppleSwap

AppleSwap

The best DEX for newborn projects on Binance Smart Chain (BSC)

The Project

We are a decentralized exchange (DEX) built on the Binance Smart Chain network focused on newborn projects! Beyond organic development & financial growth, our purpose is to be the basis for several tokens with farms, stakes and swaps.

Marketing

Beyond Poocoin Ads, YouTube, ads on Crypto specialized sites, and influencers we will organize our community rallies to create more awareness and push promotion as a team. Schedule occasional AppleSwap contests to sustain community activity.

A large part of every project will be redirected to massive and consistent marketing to grow to the moon.

All in one place

We are not just a simple DEX. Our portfolio will be far beyond that. Vote for us or your favorite token on our voting platform. Play and win with our NFT Game. Token release platform. See all trade operations in a token with our Chart App.
